### Falls Prevention Strategy

Falls account for a significant number of injuries among all age groups in New Zealand. Falls are the leading cause of injury hospitalisation, and one of the top three leading causes of injury death in New Zealand. This section discusses the main objectives and ACC's role in implementing the Strategy.

For contact details or to book on training go to

Auckland: 09 634 0365  
Wellington: 04 499 2509  
Christchurch: 03 348 5788

The primary goal of the Height and Harness Safety course is to provide knowledge and tools for workers in the construction industry that will enable them to work at height and to use harnesses safely. Trainees will work through the following objectives:

- Identify hazards associated with working at height
- Systematically plan for working at height
- Focus on eliminating and isolating height hazards
- Acquire basic skills for the use of harness systems

**Site Safe's mission: To promote and advance a culture of safety in the construction industry**
