Name:	Company:

Welcome: By Jim

Guest Speaker(s):	
Tony Hough (SiteSoft)	<p>SiteSoft is an online management software. The products are Health and Safety Management, Induction Management, Access Management and Documentation Management. For example, the contractor purchases an induction code from SiteSoft and then allocates that code to a worker to complete their online induction. On successful completion of the registration and general induction, workers will receive a text message providing instructions to download the site entry App.</p> <p>That App when scanned onsite allows for authorised entry to the site – all done without paper thus having an e-product.</p> <p>SiteSoft pricing is based on the number of workers a principal contractor and their subcontractors have onsite in a month and this can be across 1 site or all of their sites. On the first day of each month the principal contractor will be charged for the total number of workers</p>

	<p>authorised by them to attend their sites.</p> <p>The pricing starts at \$50 per month for 15 users on site plus a one time training charge.</p> <p>SiteSoft will provide training of at least one person who will be nominated by the principal.</p>
<p>Jason Teoh (Stanley Black & Decker NZ Ltd)</p>	<p>DEWALT is committed for excellence in environment, health and safety management through process improvement advanced manufacturing techniques and pollution control practices. In 2007, DEWALT set itself the challenge of creating the most comprehensive system of the safest, highest performing professional construction tools in the world.</p> <p>This is the Perform & Protect system, made up of products that meet strict criteria in one or more of the following core safety-focused areas: Vibration; Dust; Control.</p> <p>Go to http://www.dewalt.co.nz to check out their products.</p>
