

COVID-19 Response Plan Flow Chart

START HERE

See COVID-19 contact type definitions [here](#).

- Isolate and get a PCR test immediately
- Get additional PCR tests on day 5 and day 8 after last exposure or onset of symptoms
- Isolate until negative result of day 8 test or for 10 days, whichever is longer

- Return to work but monitor for symptoms for 10 days
- If symptoms develop, stay home and get a PCR test immediately - isolate until a negative result is received

- Isolate and get a PCR test immediately
- Get additional PCR tests on day 5 after last exposure or onset of symptoms
- Isolate until negative result of day 5 test or for 7 days, whichever is longer

- Isolate and get a PCR test immediately
- Get a second PCR test on day 5
- Isolate until negative result of day 5 test or 7 days after last exposure, whichever is longer
- If symptoms develop after day 5, isolate until you get a negative test result

- Follow WORKER guidance
- Notify site and ask them to monitor for symptoms
- Clean shared facilities

- Treat all workers as Close Contacts
- Follow WORKER guidance
- Notify site and ask them to monitor for symptoms
- Clean shared facilities
- Instigate surveillance testing if available

- Reporting rule:**
Report one Event for each positive case, but list out the number of close contacts
