

# Safe practices when using gloves on site

## You will need to use gloves:

**Any time you are completing a manual task**  
Use your usual work safety gloves.

**If you are cleaning any surfaces**  
Use disposable gloves for this and throw them in the bin when you finish cleaning.

## Remember to:

**Avoid touching your face while wearing gloves**

**Remove your gloves and then wash your hands prior to eating, drinking or smoking/vaping**

**Practice good hand hygiene and good cough and sneeze etiquette while wearing gloves**
