

# The Five Step Guide for Returning to Work - Alert Level 2

## Before arriving on site

Each contractor must have a plan detailing the steps they will take to mitigate risks, including those presented by COVID-19. The details of the plan must be communicated to workers before they start work.

Where possible, conduct a remote induction before arrival on site, this can be done via video conferencing or by phone. If an in-person induction is required, the [Physical Distancing and Hygiene Protocol](#) must be followed.

All workers should follow the [Personal Health Flowchart](#) to confirm they are safe to be on site.

Ensure all workers understand when additional PPE may be required due to COVID-19 and that workers have access to the correct PPE as per the [Ministry of Health PPE Guide](#) and WorkSafe guidelines. When required to use [face masks](#) or [gloves](#) please follow these processes.

## Site entry

A daily register of workers entering and leaving site must be completed along with a health declaration to track and trace if you are sick. Use your existing sign-in register or the example [Sign-in Register](#).

[Signage](#) reminding workers of the COVID-19 protocols will be posted at the site entrance and in common areas where appropriate.

## Site operations

All work is to be undertaken in such a way as to reduce any possible contact between workers and to promote the [Physical Distancing and Hygiene Protocol](#).

All offices and jobsites must implement cleaning measures as per the [Cleaning Guide](#).

All tools, equipment, plant and vehicles must be used in alignment with the [Cleaning Guide](#).

Toolbox talks should be held to communicate the information contained in these protocols. A [COVID-19 Toolbox Talk](#) is available for use to assist with your Toolbox Talks.

Additional sanitary measures are to be implemented on site to prevent the spread of COVID-19 e.g. hand washing stations, provision of additional hand sanitiser, provision of disinfectant wiping products, as per the [Physical Distancing and Hygiene Protocol](#).

Smokers must follow the [Physical Distancing and Hygiene Protocol](#).

A COVID-19 [Response Plan](#) must be available and accessible on site.

## Leaving site

Workers must use the [Sign-in Register](#) to sign out.

When [Returning Home](#), workers will need to follow the necessary hygiene measures.

Each site must be cleaned and sanitised at the end of the working day or end of each shift, as per the [Cleaning Guide](#).

All waste and disposable PPE must be removed from site and securely disposed of as per the [Cleaning Guide](#).

## Management Protocols

Follow the COVID-19 [Manager's Checklist](#).

Communicate the site expectations and prevention measures to all workers and contractors.

You must have a COVID-19 [Response Plan](#) in place to identify processes for dealing with probable and confirmed COVID-19 cases.

Stay in contact with all workers including those who may be in isolation or working remotely. Conduct Toolbox Talks regularly and keep track where and when workers are on site for contact tracing purposes and ensure they have the correct PPE.

Don't forget your normal health and safety obligations still apply. These protocols are in addition to your usual health and safety controls.
